DWA_08 Discussion Questions

In this module you will continue with your "Book Connect" codebase, and further iterate on your abstractions. You will be required to create an encapsulated abstraction of the book preview by means of a single factory function. If you are up for it you can also encapsulate other aspects of the app into their own abstractions.

To prepare for your session with your coach, please answer the following questions. Then download this document as a PDF and include it in the repository with your code.

_____

1. What parts of encapsulating your logic were easy?

Weiting the internal logic because it was basically rearranging existing code.

_____

2. What parts of encapsulating your logic were hard?
Kicking things of with it and also trying to stay in line and not over do it.

_____

3. Is abstracting the book preview a good or bad idea? Why?
It is a great idea.It makes me look back to when i first encountered the code for the iwa capstone and how much of a mess it was.

_____
